PERSONAL PROJECTS :

FOOD DELIVERY WEB APP
A Java MVC and MySQL-based platform for users to order food, rate restaurants. It includes features for user registration, role-based access for admin, restaurant admins, customers, and delivery agents.

INVOICE MAKING WEB APP (secondschoice)
A small invoicing application using a Bootstrap template, PHP and MySQL. Features include storing products, managing customer data, and facilitating invoice printing.

SUK APP (College Android Application)
A final year project designed to help MCA department students by providing access to study materials and past exam papers. Developed using Java and Firebase to support learning and exam preparation.

CIE MARKS ENTRY SYSTEM
Involved in the design and implementation of the user interface using HTML, CSS, and Bootstrap. This system provides an intuitive and efficient way for users to enter and manage examination marks.

HOSTEL MANAGEMENT SYSTEM
A web application developed to manage hostel operations efficiently. Utilised VB.net and MS Access under academic supervision to support administrative and residential processes in educational hostels.
